Trim-A-Slab is sized to match **the GAP being filled**. The crown will measure greater than the size (a $\frac{3}{4}$ " size Trim-A-Slab measures a little over 1 inch across the top). This keeps Trim-A-Slab from falling into the gap.

Trim-A-Slab

Product Description	Fits Expansion Joint Gap Size	Lowe's Item Number	Model Number	UPC	Coil length	MRSP
1/2" Black	3/8" to 5/8" wide	1061654	3080	856857003080	50'	\$ 74.50

3/16" Grey	1/8" to 1/4" wide	1061643	3264	856857003264	500'	\$ 234.00

3 colors are standard: Black, Walnut, and Grey. Grey will be the best match to clean, dry concrete. Grey and Walnut may show tire marks and dirt, but can be easily cleaned with soap and water.

Applications: Driveways, sidewalks, patios, pool decks...between two concrete slabs, or between slabs and foundations.

Trim-A-Slab is intended for use between rounded-edge slabs. Use on sharp-edged slabs should be evaluated by the end-user, as the crown will sit on top of the slab, and may produce a trip hazard.

How to install Trim-A-Slab

Press in;
typically can be
pressed in by
hand

Cuts easily with
pruning shears or
a PVC cutter
